

THE SAILORS CHOICE BIMINI

The Sailors Choice Bimini is second to none. Our experience and design have made our bimini's some of the best looking and most durable around. Our Bimini's incorporate designs to fit your cockpit around winches and even allow the backstay to go through the bimini. Neatly and smart! Our bimini's are traveling up and down the East Coast enduring the hardships of elements and protecting those underneath.

CONSTRUCTION AND STANDARD FEATURES

All our biminis are constructed with only the highest quality materials available. Our frames are made with high quality thick wall stainless steel tubing. All our fittings used are also high grade stainless steel. We custom bend our frames in house to assure proper fit and coverage.

During the construction phase, we use only [Sunbrella](#)[®] fabric. This acrylic fabric is simply the best and most durable fabric made for marine use. High load areas are reinforced and engineered for durability. All exposed seams and edges are finished off with Sunbrella material binding for an outstanding finished product. Sunbrella material is available in just about any color and will certainly add a distinctive look to your boat. Our biminis attach to the frame with zippered pockets for easy installation and removal. Only YKK marine quality zippers are used for long life. For an even longer life we sew the bimini with polyester UV coated thread. We try to keep unnecessary sewing to a minimum and make our biminis simple to provide long years of service. All our biminis come with a boot for storage making it possible to get the bimini out of the way when not desired.

AVAILABLE OPTIONS

Our biminis are built to take on a variety of options. We are able to incorporate a vast assortment of added protection such as side panels and enclosure pieces. Our biminis are able to be attached by a panel to our dodger or even yours to provide complete protection. These filler panels can be either clear or solid. We have even developed a zippered cover sight window in the middle of the bimini to give access to seeing the main for trimming.
