

SAILORS CHOICE DODGERS

The Sailor's Choice Dodger is a custom tailored dodger engineered to meet your needs within the confines of your boat design. Years of sailing experience, combined with countless dodger patterns have made possible the ultimate dodger for your boat. You pick the height, the coverage and style, we make it work. At Sailors Choice, all canvas projects are custom. We build to suit your needs and desire to make a fully functional dodger that compliments your boat with style and grace.

CONSTRUCTION AND STANDARD FEATURES

All our dodgers are constructed with only the highest quality materials available. We start with thick wall high-grade Stainless Steel tubing and fittings to create a frame which will fit your boat exactly. The 7/8 inch tubing is bent in our shop and shaped for maximum size to fit your boat correctly. We then install the frame and take a pattern to your specifications and needs.

During the construction phase, we use only Sunbrella fabric. This acrylic fabric is simply the best and most durable fabric made for marine use. We reinforce all load areas and points of attachment with dacron material and finish off all exposed areas with Sunbrella fabric binding for an outstanding finish. Sunbrella material is available in just about any color and will certainly add a nice distinctive look to your boat. Our dodgers are constructed for maximum visibility and use .030 high grade double polished crystal clear window vinyl sheets. All frame attachments are zippered on and off and opening windows use YKK marine zippers and are reinforced and hidden for maximum UV protection. For an even longer life we use UV coated polyester thread for sewing. Our installation on your boat is done using only high quality TRW fasteners and securely installed. Finally, for extra protection, the aft edge of our dodgers are reinforced with a textured vinyl for grip and durability. All these construction features make for the highest quality and longest lasting dodger available.

We offer two basic dodger designs which cover just about any boat shape. Sometimes one design lends itself better than the other so we take time to discuss design and options with you. We take pride in developing a dodger that looks great on your boat.
